

CALL FOR BOOK CHAPTERS

Nature, Health, and Humanity: Science, Society, and **Interdisciplinary Perspectives**

An Edited Book With **ISBN**, **e-ISBN** & **DOI**

Greetings,

In a rapidly changing world shaped by climate change, urbanization, and evolving health challenges, the relationship between nature, human health, and society has become more critical than ever.

This edited volume aims to bring together diverse voices across disciplines - from science, arts, commerce, education, and Indigenous Knowledge Systems (IKS) - to explore real-world challenges and solutions. The book moves beyond traditional academic writing to present accessible, engaging, and impactful narratives that connect research with everyday life.

We invite contributions that are interdisciplinary, practical, and thought-provoking, integrating scientific insights with societal relevance.

This book is not just an edited volume, it is:

An interdisciplinary, real-world, and accessible academic work connecting science with society.
