for the Edited Book

Interdisciplinary Research Design and Development in the Contemporary Scientific Trend

An Edited Book with **ISBN** **E ISBN** **DOI**

1 Publisher & Editorial Board

Publisher: Cogniverse Press, International Publisher, Jorhat, Assam
Editors:

- **Dr. Tusar Kanti Das**, Assistant Professor, Department of Mathematics, Dudhnoi College (Autonomous), Goalpara, Assam
- **Dr. Soma Dhar**, Assistant Professor, Department of Statistics, Handique Girls' College, Guwahati, Assam
- **Dr. Sourav Rana**, Assistant Professor, Department of Mathematics, IEST, Shibpur, West Bengal
- **Dr. Mompi Sharma**, Assistant Professor, Department of Statistics, B. Borooah College (Autonomous), Guwahati, Assam

2 Concept and Rationale

In an era of rapid technological advancement and complex interdisciplinary challenges, solving real-world problems demands a synthesis of diverse analytical and empirical methodologies. This edited volume seeks to consolidate high-quality scholarly contributions on interdisciplinary research design and development, reflecting contemporary scientific trends. By highlighting applied research, innovative frameworks, and cross-disciplinary perspectives, this book is envisioned as a comprehensive resource for academics, researchers, data scientists, and practitioners, fostering knowledge dissemination and advancing transformative discourse across the scientific community.

3 Key Objectives

Compile Diverse Viewpoints: Gather original research findings and theoretical frameworks across interdisciplinary scientific domains.

Foster Academic Collaboration: Encourage meaningful collaboration among scholars, educators, data analysts, and industry professionals (if possible).

Provide a Reference Resource: Establish a benchmark reference for future academic, computational, and applied scientific endeavors.

4 Proposed Structure & Scope

Section I	Foundations of Interdisciplinary Research Exploring theoretical frameworks, methodological paradigms, and the historical evolution of interdisciplinary studies
Section II	Statistical Applications in Interdisciplinary Research Highlighting advanced statistical methodologies, empirical tools, and data analytics in education, social sciences, and applied sciences
Section III	Mathematical Modelling in Contemporary Science Showcasing mathematical models, computational frameworks, and simulation techniques that bridge abstract theory with real-world scientific problems
Section IV	Emerging Trends in Data-Driven Studies Addressing cutting-edge developments in big data analytics, machine learning, artificial intelligence, and predictive modeling in modern contexts

Each section will comprise peer-reviewed chapters contributed by domain experts to ensure rigorous academic standards and topical relevance.

5 Call for Chapters & Submission Details

High-quality, unpublished research chapters aligned with the themes above are invited for peer review and publication. Authors are requested to submit their full chapters in Microsoft Word format adhering to standard academic formatting guidelines.

SUBMIT YOUR CHAPTERS TO:
bookchapters42@gmail.com

- Subject Line Format: Chapter Submission - [Book Title] - [Corresponding Author Name]
- The maximum length of the chapter must be **15 pages**, including references.

6 Important Dates & Submission Timeline

Call for Chapters Issued	October 16, 2026
Chapter Submission Deadline	December 10, 2026
Review and Revision Period	January 10, 2027
Final Manuscript Submission to Publisher	January 15, 2027
Expected Publication Date	January 31, 2027

7 Submission Guidelines

- Write your chapter using the given template only.
- Article should be original.
- Authors will receive a complimentary soft copy of the book.
- Printed copies will be available at actual printing cost.
- Only the authors of the selected manuscript's will be informed through mail to deposited Rs 500/- as a publication fee.
